

# A ROUTE TO SUCCESS

DARK FIBER

Over the last few years, GIX has set out to redefine how the dark fiber market is served in Lower Manhattan and Northern New Jersey. Our focus has been on developing and constructing a new, diverse, high count fiber network between 60 Hudson and 165 Halsey using the Port Authority's Path Tunnel.

GIX will be the first carrier neutral dark fiber company to construct a Hudson River crossing in over 20 years using the latest technologies in fiber and equipment.
